eDIRECT+[®] Transactional Email

OFFER A SUPERIOR CUSTOMER EXPERIENCE

eDIRECT+ HIGHLIGHTS

ABOUT eDIRECT+

Minisoft's eDIRECT+ is the transactional emailing tool designed for retailers that want to offer superior customer experiences while selling more products and services. eDIRECT+ enables you to be more responsive to your customers through the delivery of event-triggered, personalized, full-color HTML messages that reflect your brands and styles.

Seize the moment

eDIRECT+ ensures that your customers experience your brand from the start of a sale to the end, helping build customer loyalty and brand recognition at every step in the fulfillment of your customers order.

Customizable

Transform plain-text event-triggered emails into highly branded and personalized messages, capable of driving incremental revenue through relevant cross-sell and upsell offers.

Integration

Minisoft's eDIRECT+ is designed to integrate seamlessly with existing back-end business processes and data sources so that customized messages are generated automatically.

Management Tools

Track open rates, unsubscribes, and one-click opt-outs. Measure the success or failure of real-time client interactions.

Sell more with every package you ship

eDIRECT+ will enhance email marketing performance, boost deliverability and lower costs.

FEATURES

- Support for HTML, Secure PDF or XML output.
- Style sheets support (CSS) included.
- Conditional logic to set up simple or complex “what if” conditions that determine what and when content is sent and to whom.
- Easily incorporate web links, pictures and graphics into emails.
- Ensure delivery of readable emails by sending in multi-part MIME (recipient will receive HTML or text versions dependent on their email settings).
- Smart email management tools to track open rates, unsubscribe, one-click opt-out and bounced emails.
- Schedule dates and times to send automated invitations, “save the date” reminders, confirmations, and post-event “thank you’s”.
- SMS Gateway support for text notifications and alerts.
- Direct output to one or more output destinations including email, SMS (Short Message Service), printfile, diskfile or fax.
- Ad-hoc email for sending personalized emails to specific customers.

MICRO-TARGETING

Minisoft's eDIRECT+ features powerful capabilities for micro-targeting your customers by keeping track of their prior purchases and stated preferences. This is what allows eFORMz to decide what products or services to offer your customers. eDIRECT+ also includes connectivity with "Big Data" solutions like MyBuys, Rich Relevance and Certona providing still more options for micro-targeting of your customers.
